PHYSICS LETTERS B

Abstracted/Indexed in: Current Contents: Physical, Chemical & Earth Sciences/INSPEC/Physics Briefs

Volume 362, numbers 1,2,3,4 **9 November 1995**

Contents

Nuclei

Diquarks in a chiral soliton field
U. Zückert, R. Alkofer, H. Weigel and H. Reinhardt 1

Equation of state for a non-ideal quark gluon plasma
V.M. Bannur 7

Two model-independent results for the momentum dependence of ρ-ω mixing
K. Maltman 11

Decay anisotropy of e^+e^- sources from pN and pd collisions
E.L. Bratkovskaya, W. Cassing, U. Mosel, O.V. Teryaev, A.I. Titov and V.D. Toneev 17

Chiral dynamics and the $S_{11}(1535)$ nucleon resonance
N. Kaiser, P.B. Siegel and W. Weise 23

Chaos driven by soft-hard mode coupling in thermal Yang-Mills theory
T.S. Biró, S.G. Matinyan and B. Müller 29

Search for double Gamow-Teller strength by heavy-ion double charge exchange
J. Blomgren et al. 34

Particles and fields

On self-similar global textures in an expanding universe
S. Åminneborg and L. Bergström 39

An infinite number of potentials surrounding the 2d black hole
Y.S. Myung 46

2D quantum dilaton gravitational Hamiltonian, boundary terms and new definition for total energy
H.J.W. Müller-Kirsten, J.-G. Zhou, Y.-G. Miao and J.-Q. Liang 51

Macroscopic three-loop amplitudes and the fusion rules from the two-matrix model
M. Anazawa, A. Ishikawa and H. Itoyama 59

$N = 1$ string duality
J.A. Harvey, D.A. Lowe and A. Strominger 65

String theory near a conifold singularity
D.P. Jatkar and B. Peeters 73

$N = 2$ supersymmetric Calabi-Yau hypersurface sigma-models on curved two-dimensions
H. Nishino 78

Duality and the Legendre transform
C. Ford and I. Sachs 88

Squeezed neutrino oscillations in quantum field theory
E. Alfinito, M. Blasone, A. Iorio and G. Vitiello 91

The classical sphaleron transition rate exists and is equal to $1.1(\alpha_w T)^4$
J. Ambjørn and A. Krasnitz 97

Chiral condensate, master field and all that in $QCD_2(N \to \infty)$
B. Chibisov and A.R. Zhitnitsky 105

Three-body relativistic flux tube model from QCD Wilson-loop approach
N. Brambilla, G.M. Prosperi and A. Vairo 113

SU(3) lattice gauge theory in the fundamental–adjoint plane and scaling along the Wilson axis
U.M. Heller 123

Landau pole screening in the Gross-Neveu model: $1/N$ versus operator product expansion
K. Langfeld, L. v. Smekal and H. Reinhardt 128

The large top quark mass expansion for Higgs boson decays into bottom quarks and into gluons
S.A. Larin, T. van Ritbergen and J.A.M. Vermaseren 134

(Continued inside)

0370-2693(19951109)362:1/4;1-J

PHYSICS LETTERS B

Volume 362, numbers 1,2,3,4 **9 November 1995**

Contents

(Continued from page 4 of cover)

Six-jet decay of off-shell WW pairs at e^+e^- colliders
E. Accomando, A. Ballestrero and E. Maina 141

On the possibility of detecting the $e^-e^- \to W^-W^-$ process in the Standard Model with additional right-handed neutrinos
J. Gluza and M. Zrałek 148

Limits on pseudoscalar bosons from rare Z decays at LEP
G. Rupak and E.H. Simmons 155

Single spin asymmetry for $p^\uparrow p \to \pi X$ in perturbative QCD
M. Anselmino, M. Boglione and F. Murgia 164

$f_B^{\rm stat}$ and μ_π^2 in the quasiclassical approximation of sum rules
V.V. Kiselev 173

Glueballs in peripheral heavy-ion collisions
A.A. Natale 177

Locality of the strange sea in the nucleon
X. Ji and J. Tang 182

Cumulative author index to volumes 361–362 189
